

Care Based Incentives (CBI) Generic Prescriptions Measure Update

This measure rates the percentage of generic prescriptions filled over all prescriptions filled during the measurement period. The Alliance has updated the generic prescription drug classes to maintain quality of care and reduce costs of prescription drugs.

The following were added to the drug class list:

- * Sedatives
- * Anticoagulants
- * Attention Deficit/Hyperactivity Disorder (ADHD)
- * Antihyperlipidemic

The following have been removed from the drug class list:

- * Hypertension & Cardiovascular

Please see the complete drug class list below.

Therapeutic Class	Description
Antidepressants and Sedatives	SSRIs, SNRIs and Benzodiazepines
Antihyperlipidemic	HMG COA Reductase Inhibitors
Anti-ulcer agents	Proton pump inhibitors (PPIs)
Diabetes	Oral and self-injected antidiabetic agents
Anticoagulants	Warfarin and Novel Oral Anticoagulants (NOACS)
Attention Deficit / Hyperactivity Disorder (ADHD)	Stimulant and non-stimulant (atomoxetine)
Antimigraine	Oral and Self Injected Triptans
