

Corrected Information: Pediatric Developmental Screenings

Please ensure that all pediatric Alliance members receive developmental screenings per the following American Academy of Pediatrics guidelines:

- * Include developmental concerns at each pediatric preventive care visit to age five
- * Remember health screenings include developmental screenings at:
 - 9 months
 - **18 months**
 - 30 months (may be done at 24months)

The Alliance will reimburse for developmental screenings with scoring and documentation with a standardized instrument with CPT 96110. This code is reimbursable for members 0-17 years of age. Developmental screenings without standardized instrument scoring and documentation are included in the Health Assessment/Well Child Check/Preventive visit.

- * All Alliance members are eligible for preventive exams at least annually.
