Behavioral Health Treatment Transition

Effective July 1, 2018, the Department of Health Care Services has expanded the transition of Behavioral Health Treatment (BHT) services from the Regional Centers to the managed care plans for members less than 21 years of age. In 2014, these services were transitioned for members with Autism Spectrum Disorder (ASD). As of July 1, 2018 the Alliance will be administering BHT services for all of our Medi-Cal members less than 21 years of age.
