Re: **ADD CHILD HEALTH AND DISABILITY PREVENTION BILLING CODES 85, 86 AND 87 FOR BIVALENT HUMAN PAPIILLOMAVIRUS VACCINE (BHPV)**

Effective October 21, 2009, Medi-Cal has added the following bivalent HVP codes as payable codes to the CHDP program;

- Code 85 is payable for females ages 9 years through 18 years, 11 months, administration fee only. Vaccine source is VFC.
- Code 85 is for a maximum of three doses, with a series interval between 1st and 2nd dose of 28 days; series interval between 2nd and 3rd dose is 84 days.
- Codes 86 and 87 are payable for females ages 19 years through 20 years and 11 months, for non-VFC purchased vaccine, and both codes must be billed per vaccine dose.
- Codes 86 and 87 are for three (3) doses, series interval between first and second dose is 28 days; series interval between second and third dose is 84 days.

<u>Quadrivalent Human Papillomavirus (HPV)</u>	76	VFC	9 years thru 18 years, 11 months	\$ 9.00
	77 + 78	Purchased	19 years thru 20 years, 11 months	\$146.96
<u>Bivalent Human Papillomavirus (BHPV)</u>	85	VFC	9 years thru 18 years, 11 months	\$9.00
	86 + 87	Purchased	19 years thru 20 years, 11 months	\$150.38

Please call your Provider Services Representative if you have any questions.
